Experience

BARTR LAB | Wed Developer Intern   **JUNE 2025 – JULY 2025**
- Used Git for version control with branching, code reviews, and PR checklists to maintain code quality and speed up release cycles.
- Refactored legacy styles into modular, reusable CSS and utility classes, reducing duplication and cutting stylesheet size while maintaining pixel-accurate layouts.
- Built and shipped responsive UI components in HTML, CSS, and JavaScript, improving page load performance and visual consistency across breakpoints and devices.

Projects

OKTOPUS - link   **AUG 2025**

- Developed a production-ready anonymous group chat application enabling real-time communication without user registration.
- Built with **React** and Firebase, supporting thousands of concurrent users with features like instant messaging, user presence tracking, content moderation, and push notifications.
- Implemented enterprise-level functionality including profanity filtering, message reactions, and comprehensive analytics dashboard.

PERSONAL PORTFOLIO WEBSITE - link   **JULY 2025**

- Developed a responsive personal portfolio website using **HTML, CSS, JAVASCRIPT** to showcase my professional skills & projects.
- The site features smooth animations, intuitive navigation, and mobile-friendly design optimized for all devices.
- Deployed on Vercel with integration, creating digital presence that represents my personal brand.
